

## What we offer

- › Ready-to-use Formulations and high-quality ingredients
- › Cellulose gum
- › Zinc Oxide
- › Chelating Agents
- › Macrogol
- › Sorbitol
- › And others

## Formulation Concepts & Ready-to-use Solutions for Cosmeceutical and TOPICAL PRODUCTS

We support customers with high-quality and medical grade ingredients as well as ready-to-adapt formulations for a wide range of cosmeceutical applications and MDR products. Our portfolio enables targeted skin-health solutions backed by science and technical expertise.

### Silicone Gel

- › High-quality silicone ingredients
- › Non-greasy / non-stinging
- › Wash-off resistance
- › Skin protection
- › **Useful for Scar and Stretch Mark Treatments**

### Example Silicone Gel Formulations:

- › Mattifying Gel
- › Refreshing Gel
- › UV Gel
- › Substantive Gel
- › Ever Gloss Gel

### Moisturising Cream & Emulsion

- › Increase and maintain the skin's hydration level
- › Water-soluble humectans
- › Oils and emollients that soften the skin
- › **Useful for Dry Skin & damaged Skin Barrier**

### Example Emulsion Formulations:

- › Moisturizing Atopi Smooth-Cream
- › Moisturizing W/O Emulsion
- › W/O Emulsion with Urea

## What we offer

- › Tailored formulation development support
- › High-quality ingredients that meet the requirements of the pharmaceutical industry
- › Product regulatory and documentation support
- › State of the Art Lab & Innovation Centre for tests and training

## MDR compliant Topical Solutions

We provide a range of prototype formulations that serve as starting points or turnkey concepts for your next development. These can be customized to fit your preferred texture, claim or market positioning.

### Scar Care & Stretch Mark

Scar care and stretch mark treatments focus on improving skin elasticity and supporting optimal barrier recovery. Silicone-based systems, hydrating polymers, and soothing actives help smooth the skin's appearance and enhance long-term skin resilience.

### Acne

Acne occurs when excess sebum and dead skin cells clog pores, leading to inflammation and breakouts. Gentle, non-comedogenic formulations help calm the skin while supporting a balanced oil-moisture level.

### Dry Skin & Atopic Skinbarrier

Dry skin results from a weakened barrier that cannot retain moisture effectively. Hydrating and lipid-rich formulations help restore smoothness and reduce tightness and irritation.
