August 3rd , 2012

Dear valuable customer,

I am pleased to officially introduce our new trademark named Promyde ®. This change forms part of our strategy of positioning our products in the different global polyamide markets.

Nurel´s strong investment in R&D is definitely *progressing polyamide* to new levels with innovative products in new markets, hence the slogan.

As from 17<sup>th</sup> September onwards, you will receive Nurel polyamide under our new trademark Promyde. This is a purely commercial substitution of the former trademark Novamid ®.

The quality of Promyde products will be exactly the same with the same references than the former Novamid.

Neither will be there any changes in the product formulas and certifications, nor in the manufacturing processes and production location.

For further assistance on this topic please contact with your Nurel product manager.

Yours faithfully,

Dr. Miguel-Ángel Caballero  
Managing Director

**Nurel Engineering Polymers**
